SPARTAN
INTEGRATED SERVICES PTY LIMITED

Specification sheet

Business nbn

Powered by **Vocus**

A business nbn® connection set up, monitored and supported by the same team that looks after your IT. Tell us your address and we will confirm what is available and which plan fits.

Plans, speeds and service levels

Plan	nbn® speed tier	Typical business-hours speed	Fault restoration	Connection types	Price per month (inc GST)
nbn® 50	50/20 Mbps	50/17 Mbps	Standard. 12 and 4-hour priority available	FTTP, HFC, FTTC, FTTN, FTTB	**$64**
nbn® 250	250/100 Mbps	210/85 Mbps	12-hour priority target, included	FTTP and HFC	**$84**
nbn® 500	500/200 Mbps	425/170 Mbps	4-hour priority target, included	FTTP	**$104**
nbn® 1000	1000/400 Mbps	894/340 Mbps	4-hour priority target, included	FTTP	**$124**

Service specifications

Specification	Detail
Data	Unlimited
Static IP	One static IP address included on every plan
Minimum term	One month, with no lock-in contract
Typical speeds	Measured on the Vocus network, Monday to Friday, 9am to 5pm
Access technologies	FTTP, FTTN, FTTB, FTTC, HFC and Fixed Wireless
Optional modem	NetComm NL20MESH with built-in 4G backup
4G backup	Data only, up to 20/2 Mbps. Runs during a confirmed nbn® fault or while the service is being activated, for up to 30 days. Needs the supplied modem
Fibre upgrade	Usually no charge at eligible FTTN and FTTC addresses, with a typical lead time of about two weeks. nbn® fits a connection device outside and a connection box inside

If you bring your own router

- Supports the nbn® technology at your premises
- Supports PPPoE and manual network settings
- Dual-band Wi-Fi on 2.4 GHz and 5 GHz
- Unlocked and factory reset before installation
- Has an Ethernet WAN port, not ADSL only
- Runs current firmware
- Wi-Fi 5 as a minimum. Wi-Fi 6 or later for the faster plans

Speeds shown are the maximum for each nbn® wholesale tier. The speed you get depends on the nbn® technology at your address, your equipment and network conditions. We confirm what is achievable before you order.
