SPARTAN
INTEGRATED SERVICES PTY LIMITED

Specification sheet

Fast fibre

Powered by **Vocus**

A dedicated fibre line into your building with equal upload and download speeds. Capacity is yours alone, so performance at 10am on a Monday matches performance at midnight.

Plans and pricing

Plan	Download / upload	Price	Suitable for
Fibre 250	250 / 250 Mbps	**$319** per month (ex GST)	Smaller offices that rely on cloud file sharing and video conferencing.
Fibre 500	500 / 500 Mbps	**$439** per month (ex GST)	Medium offices with many people on calls and in cloud systems at once.
Fibre 1000	1000 / 1000 Mbps	**$629** per month (ex GST)	Larger offices and heavy users, such as very large file uploads.

Vocus fibre and nbn® Enterprise Ethernet compared

Specification	Vocus fibre	nbn® Enterprise Ethernet
Speeds	250 Mbps to 2 Gbps symmetrical. 5 and 10 Gbps on request	Up to 1 Gbps symmetrical. A 1 Gbps service delivers up to 952 Mbps
Capacity	Dedicated, 1:1 contention	Best-effort or committed class of service
Availability target	99.95%	99.90%
Fault restoration target	4 hours, 24×7	12 hours, 24×7. Upgrades to 8, 6 or 4 hours
Contract terms	24, 36 or 48 months	12, 24, 36 or 48 months
Data	Unlimited	Unlimited
Where available	Buildings already on the Vocus network, about 20,000 nationally	Business addresses across the nbn® fixed-line footprint
Typical install time	Within 35 business days at connected buildings	Confirmed at feasibility

Handover and equipment

Specification	Detail
Carrier network support	24 hours a day, every day of the year
Static IP	One usable static IP address included
Handover	Ethernet. RJ45 (1000BASE-T) for services up to 1 Gbps, SFP+ (10GBASE-LR) above that
Network termination unit	Carrier supplied. Four 1 Gbps ports, 220 × 44 × 212 mm, 27 W maximum. Units for 2 to 10 Gbps have up to two 10 Gbps ports
Services on one fibre	Up to four, such as internet, a private network and voice, sharing up to 1 Gbps
Speed changes	Delivered at the ordered speed with no bursting. You can move up a plan during the term
Your own router	Supported. It must handle DHCP and IPoE
Also available on the same fibre	Private links between sites, SIP trunks from 2 to 100 sessions, and direct connections to AWS and Azure

What changes the price of business fibre

Where the building is
Carriers price by zone. CBD and metro business areas cost less to serve than outer and regional sites.

Whether fibre is already there
If fibre has to be built into the building, there may be a construction charge and a longer wait.

Contract term
A 36-month term carries the lowest monthly price. Shorter terms cost more per month.

Class of service and restoration target
Best-effort capacity costs less than committed capacity, and a faster guaranteed fault response costs more.

Starting prices for a 36-month term at a building already connected to Vocus fibre. Where Vocus fibre does not reach, we quote nbn® Enterprise Ethernet. Final pricing, installation cost and lead time are confirmed after a feasibility check.
